Hassan Nasser Mohamed Hussien

QA Tester | Manual Testing | Automation Testing

Cairo, Egypt | +20 1141320693 | elkashefhassan1@gmail.com | Hassan Elkashef | hassannasserr

Professional Summary

QA Tester with hands-on experience testing web and mobile applications through functional, exploratory, regression, UI, responsive, and cross-browser testing. Skilled in designing and executing test cases, documenting defects with clear reproduction steps, and verifying fixes with development teams. Familiar with API testing using Postman and test automation using Selenium WebDriver, Python, and pytest. Software Engineering graduate with a strong understanding of SDLC, Agile practices, and application development.

Education

Arab Academy for Science, Technology and Maritime Transport (AASTMT) Sep 2022 – Jun 2026
College of Computing and Information Technology
Bachelor of Science in Software Engineering
GPA: 3.73/4.00 (Excellence with Honors)

Graduation Project: Machinify **Grade: A+**
AI-powered predictive maintenance platform using industrial sensor data to predict equipment failures. Contributed to testing and validation, including unit and white-box testing, boundary and branch coverage, and fault-injection scenarios for system behavior.
Technologies: Flutter, Python, Nodejs, Express, Machine Learning, REST APIs, MongoDB.

QA Experience

Part-Time QA Tester — Bayanatz

Apr 2026 – Aug 2026

- Test web and mobile application features for functionality, validation, usability, and visual consistency.
- Perform regression, cross-browser, cross-device, and responsive testing, including RTL layouts.
- Record defects with clear steps to reproduce, expected and actual results, and supporting evidence; retest fixes with developers.
- Contribute to release checklists and communicate testing findings to the product and development teams.

Freelance QA Tester — Job Portal

Sep 2026 – Oct 2026

- Tested a multi-role job portal across job seeker, employer, admin, and guest workflows, including responsive behavior and AI-assisted features.
- Created and ran Selenium WebDriver tests with Python and pytest for smoke, login, and job-search flows; generated execution reports with pytest-html.
- Reported functional and usability issues with reproducible steps, screenshots, and retest results.

Additional Experience

Freelancing Coach — Digital Egypt Pioneers Initiative (DEPI)

Mar 2026 – Present

- Coach students on freelancing, portfolio development, proposal writing, and professional profiles through weekly sessions.
- Track learner progress against practical assignments and measurable goals.

Part-Time Coding Instructor — iSchool

- Delivered project-based Python and mBlock sessions for Grade 6 students and mentored 100+ learners. Apr 2026 – Jun 2026
- Guided students in applying programming fundamentals, structured problem solving, and computational thinking.

Testing Skills

Manual Testing: Functional, exploratory, smoke, regression, retesting, UI/UX, responsive, cross-browser, cross-device, RTL, validation, and boundary testing
Test Design: Test scenarios and cases, positive and negative testing, expected versus actual results, defect reporting, release checklists
Automation: Selenium WebDriver, Python, pytest, pytest-html; basic UI test automation
API & Data: Postman, REST API testing, SQL fundamentals
Tools: Jira, Git, GitHub, Chrome DevTools, VS Code
Ways of Working: SDLC, STLC, Agile, Scrum, collaboration with developers, defect retesting

Technical Background

Languages: Python, Java, JavaScript, PHP, C, C++, SQL
Frameworks: Selenium, pytest, Flask, Node.js, Express.js, Angular, Flutter
Databases: MySQL, MongoDB
Development Concepts: OOP, REST APIs, MVC, authentication, data structures, algorithms

Internships

MEAN Stack Trainee — National Telecommunication Institute (NTI)

- Completed 210 hours of training in MongoDB, Express.js, Angular, and Node.js. Oct 2025 – Dec 2025
- Built full-stack applications with authentication and database integration.

Back-End Development Intern — Aswan Heart Center

- Developed backend services using Sanic and Docker and collaborated through Git/GitHub. Aug 2024 – Dec 2024
- Worked with Oracle databases and Linux administration as part of the internship rotation.

IT Department Intern — Agricultural Bank of Egypt

- Assisted with SQL report automation and daily IT operations. Sep 2024
- Gained practical exposure to Linux administration and enterprise IT systems.

Projects

Academic Advisor System (GitHub)

- Built a Java desktop system for student advising, course prerequisites, and registration workflows.
- **Tech Stack:** Java, JavaFX, MySQL.

Dr. Ashraf Clinic App

- Developed a healthcare management system supporting appointments, prescriptions, and patient records.
- **Tech Stack:** Flask, MySQL, Firebase Cloud Messaging, Gemini API.

Achievements & Leadership

- Graduated with Excellence with Honors (GPA: 3.73/4.00) and ranked 6th in the Software Engineering department.
- Qualified for the Egyptian Collegiate Programming Contest (ECPC) Finals twice.
- General Manager, ICPC AASTMT Aswan Community; led technical events, workshops, and community activities.
- Programming Head, Google Developer Groups on Campus AASTMT Aswan; organized programming workshops and mentored students.

Certifications & Languages

Certifications

- Introduction to Agile Development and Scrum – IBM, Coursera
- Introduction to DevOps – IBM, Coursera

Languages: Arabic (Native) | English (Professional Working Proficiency)
